MACHINIST

We are looking for a CNC Machinist to join our Corporate family. The ideal candidate will have experience and/or training in CNC machining. They will machine various components for finished products including material handling carts and racks, automation machines, lifting devices, and much more. They must demonstrate competency in basic programming, setup, and operation of CNC equipment following all safety precautions. Strong attention to detail is a key element of the position. Additionally, they will keep the facility clean by removing debris and trash to ensure safety.

Individuals of all experience levels will be considered; starting pay will be based on experience. Will train the right individual.

JOB DUTIES:

- Set-up and operate CNC mills, lathes, and manual machine tools
- Machine components to close tolerance specifications
- Visually inspect work for conformance to print specifications.
- Maintain equipment in a condition that does not compromise safety.
- Document daily output by completing required production and quality logs.
- Keep the worksite clean.
- Follow the company's safety and quality guidelines.

REQUIREMENTS:

- Skilled in operation of CNC machinery and tooling
- Ability to interpret engineering drawings
- Mechanical aptitude and strong math skills
- Meet the individual production goals and deadlines during shift
- Forklift certifiable is a plus

EXPERIENCE:

- 2 to 5 years of related CNC experience preferred, not required

EDUCATION:

- CNC certification from a two-year college or technical school preferred, not required
