CONFIDENTIAL Protective of Your Intellectual Property

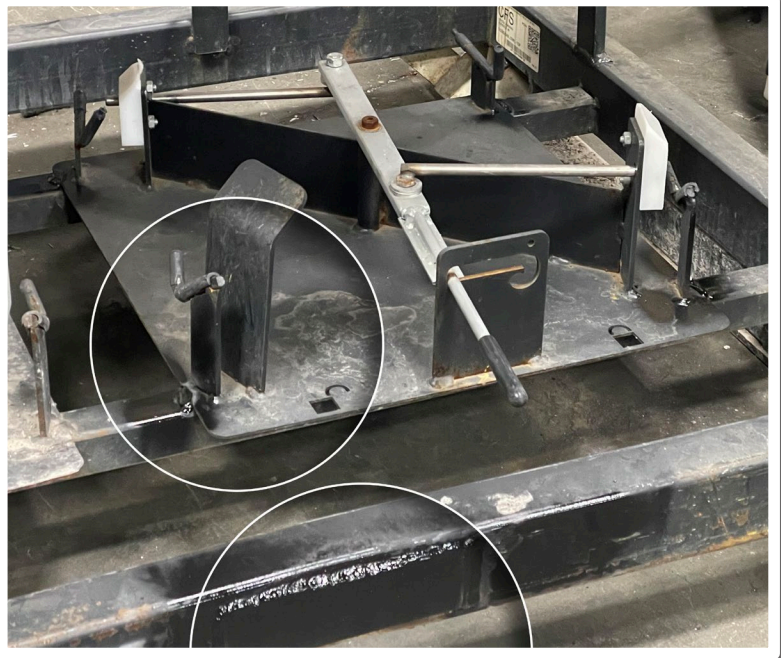

Rack/Cart Repair, Refurbishing & Modification

If your carts or racks are breaking in-house or during shipment, Plymouth Industries, Inc. will help you identify the required improvements. Even if we did not initially manufacture the cart or rack, we will still repair, modify, or refurbish.

Existing carts or racks can be re-purposed when creative solutions are applied. Plymouth Industries, Inc. has completed numerous rack conversions, where we re-purpose old racks for a new product or container. This re-purposing process helps to save our clients a significant amount of capital while providing great solutions.

Our services include:

- **Inspection:** A thorough inspection of your carts or racks will identify any damage, including dents, cracks, and bent or broken components.
- **Repair/Modification:** Welding, grinding, and other techniques are used to repair any damage or to modify existing steel racks and carts.
- **Reinforcement:** Reinforce with additional components or materials to increase strength and durability.
- **Maintenance:** Ongoing maintenance services ensure your carts and racks remain in good condition and continue to meet your needs over time.

Please contact us for a quote on your next repair or modification project.
