Lift Truck and Forklift Attachments

Plymouth Industries designs and manufactures custom lift truck and forklift attachments that transform standard equipment into purpose-built material handling solutions. Engineered for your specific load, workflow, and environment, each attachment improves control, enhances safety, and increases operational efficiency, while reducing risk to both operators and products.

Built on proven lifting expertise across mechanical, hydraulic, pneumatic, and magnetic technologies, these solutions are tailored to solve your most challenging lifting applications.

Key Problems Solved

- Unsafe or unstable lifting of irregular, heavy, or high-value loads
- Damage to parts, components, or finished goods during handling
- Inefficient workflows caused by improper lifting tools
- Operator risk due to poor load control or visibility
- One-size-fits-all attachments that don't match real-world applications

Ideal Applications / Use Cases

- Manufacturing and production environments
- Moving large, heavy, or irregular components
- Handling fragile or high-value parts
- Line-side material delivery and positioning
- Facilities requiring safer, more controlled lifting operations

Key Features & Benefits

- **Custom-engineered designs** - Optimized for your exact product, load, and process
- **Heavy-duty steel construction** - Withstands demanding industrial environments and repeat use
- **Integrated load control features** - Improves stability and reduces product damage
- **Application-specific configurations** - Handles unique shapes, sizes, and weights with precision
- **Seamless forklift integration** - Works with your existing equipment and workflows
- **Multiple lifting technologies available** - Mechanical, hydraulic, pneumatic, and magnetic solutions for maximum flexibility
